Agenda

- What is Taiga
- Steps to use Taiga
- Recommendations

WHAT IS TAIGA

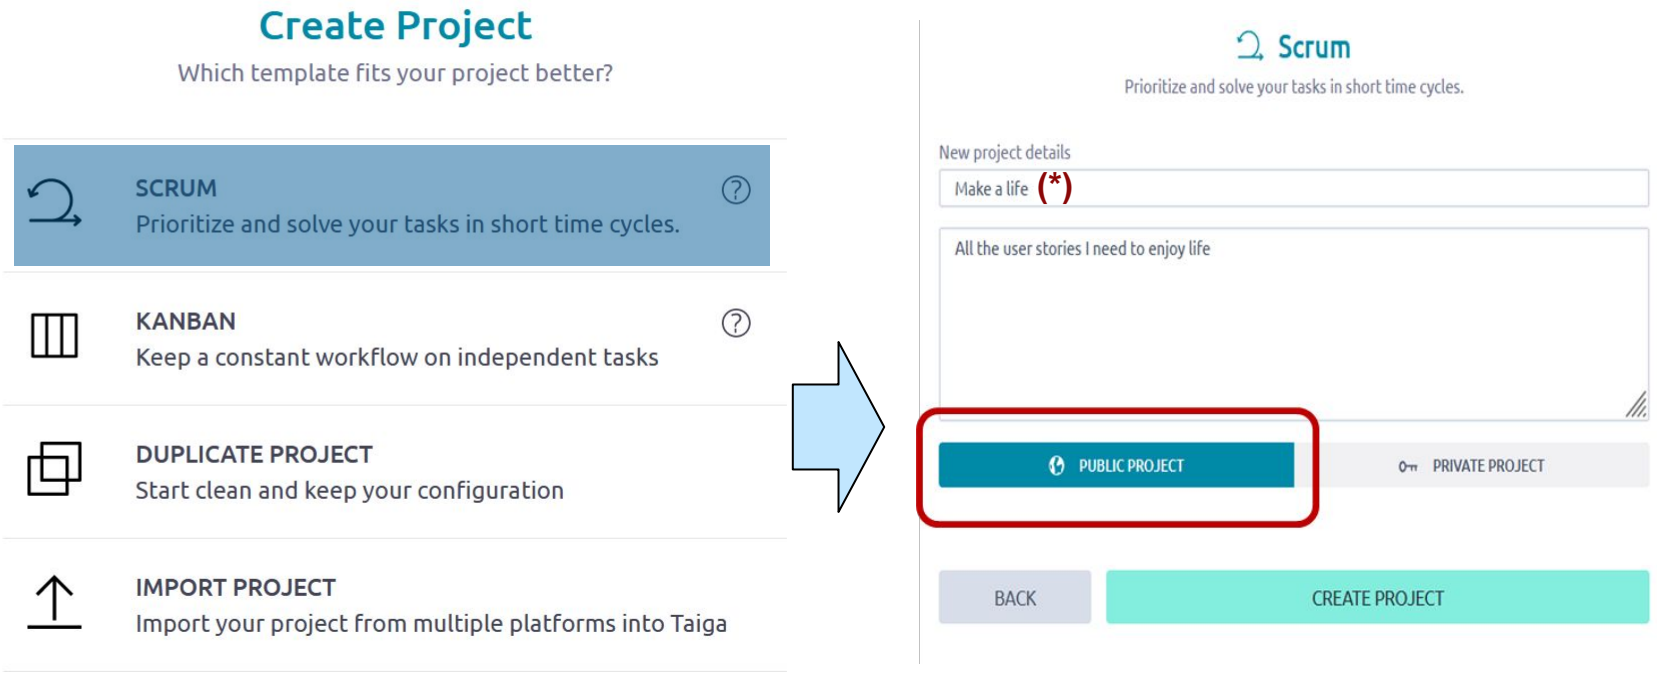

What is Taiga

- Taiga is a **project management platform** for startups and agile developers & designers who want a simple, beautiful tool that makes work truly enjoyable.
- Taiga can handle both **simple and complex projects**.
- Taiga offers both Kanban and **Scrum** templates
  - But in ASW we will use Scrum template only

https://tree.taiga.io/support/frequently-asked-questions/who-is-taiga-for/

STEPS TO USE TAIGA

Create a project (I)

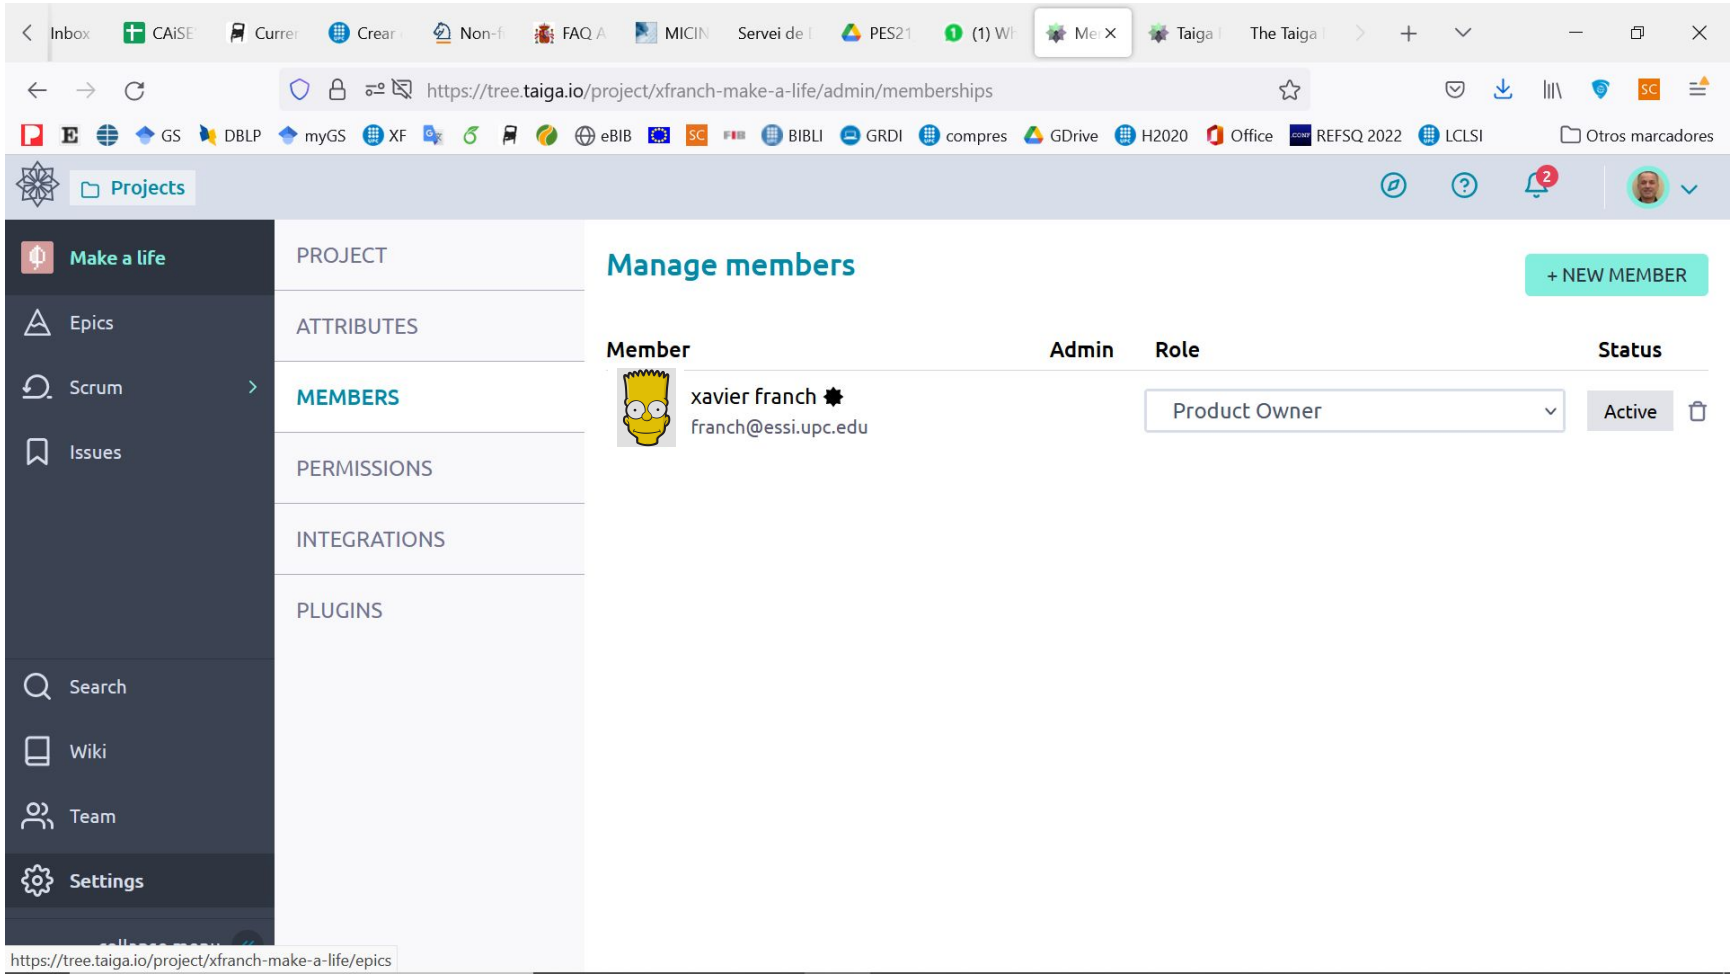

(*) IMPORTANT!

Name your project according to this pattern:

asw2627q1-<your_team_id>

(e.g. asw2627q1-hn11d)

Create a project (II)

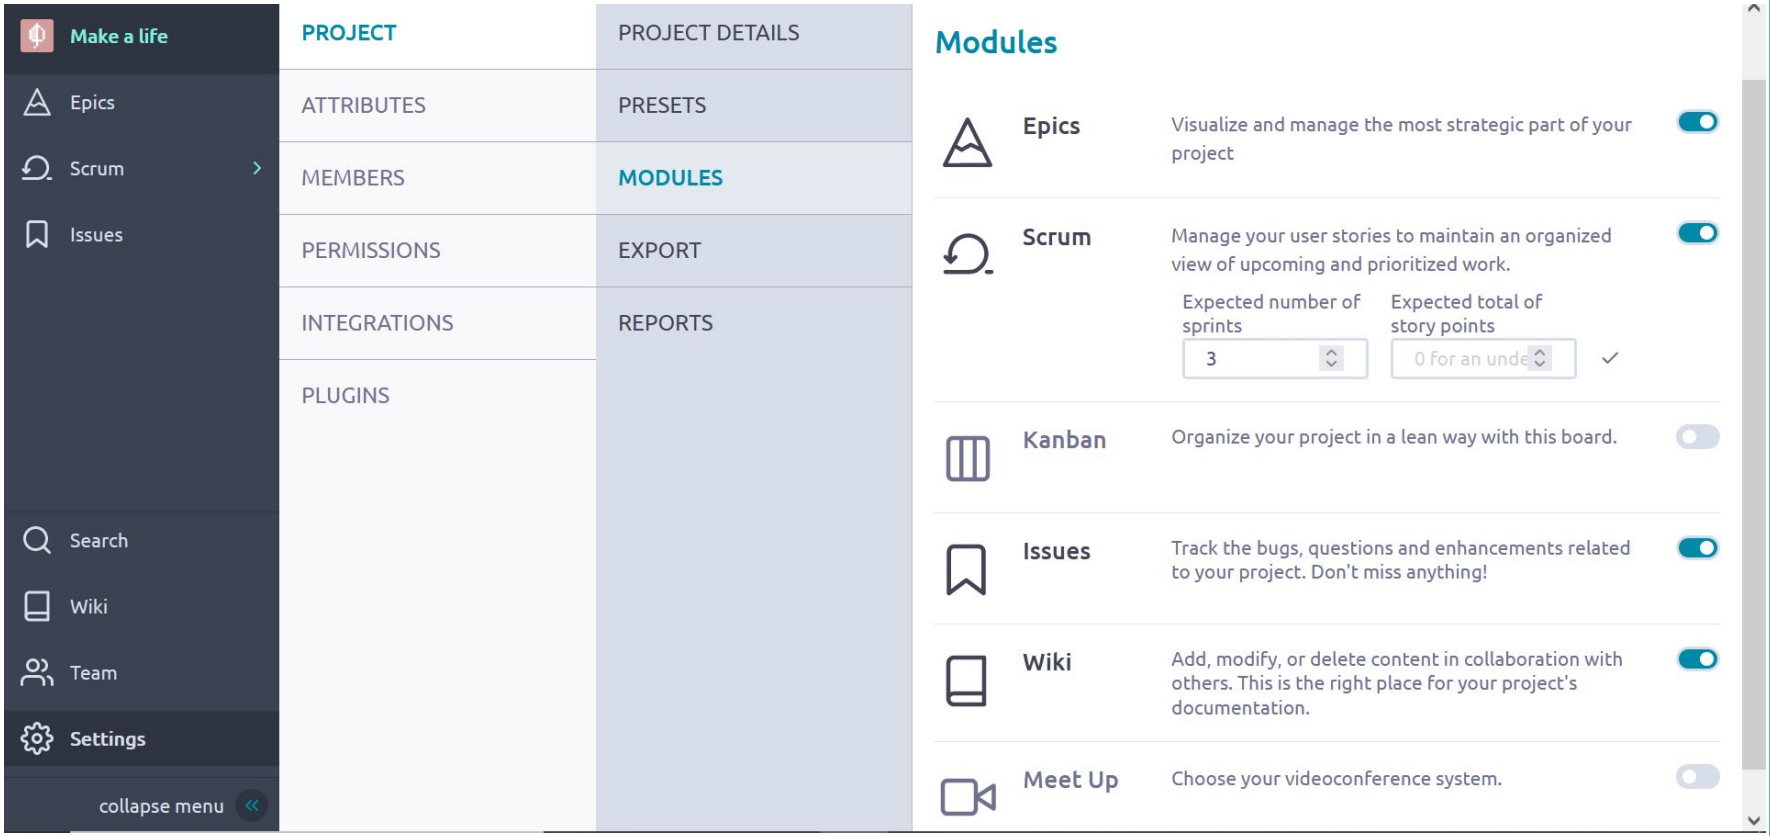

Add all team members + your teacher

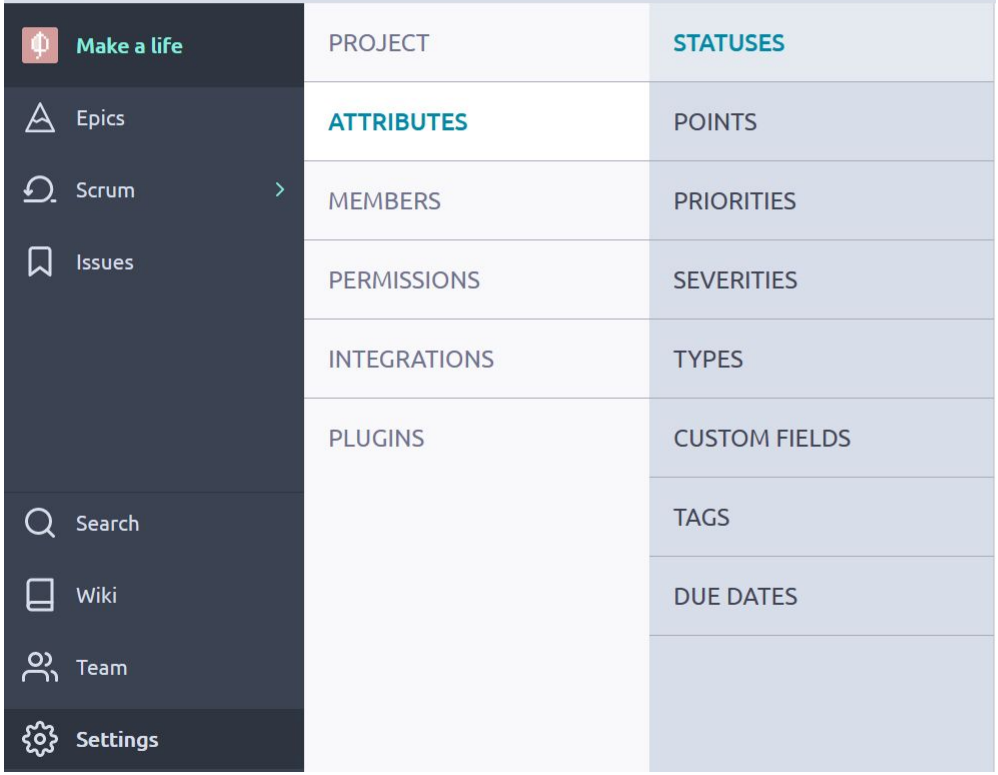

Add your teacher

- Grup 11 (dv 08-10):
  - **carlota.catot@upc.edu**
- Grups 12 (dv 10-12) i 13 (dv 12-14):
  - **carles.farre@upc.edu**

Configure Taiga (I)

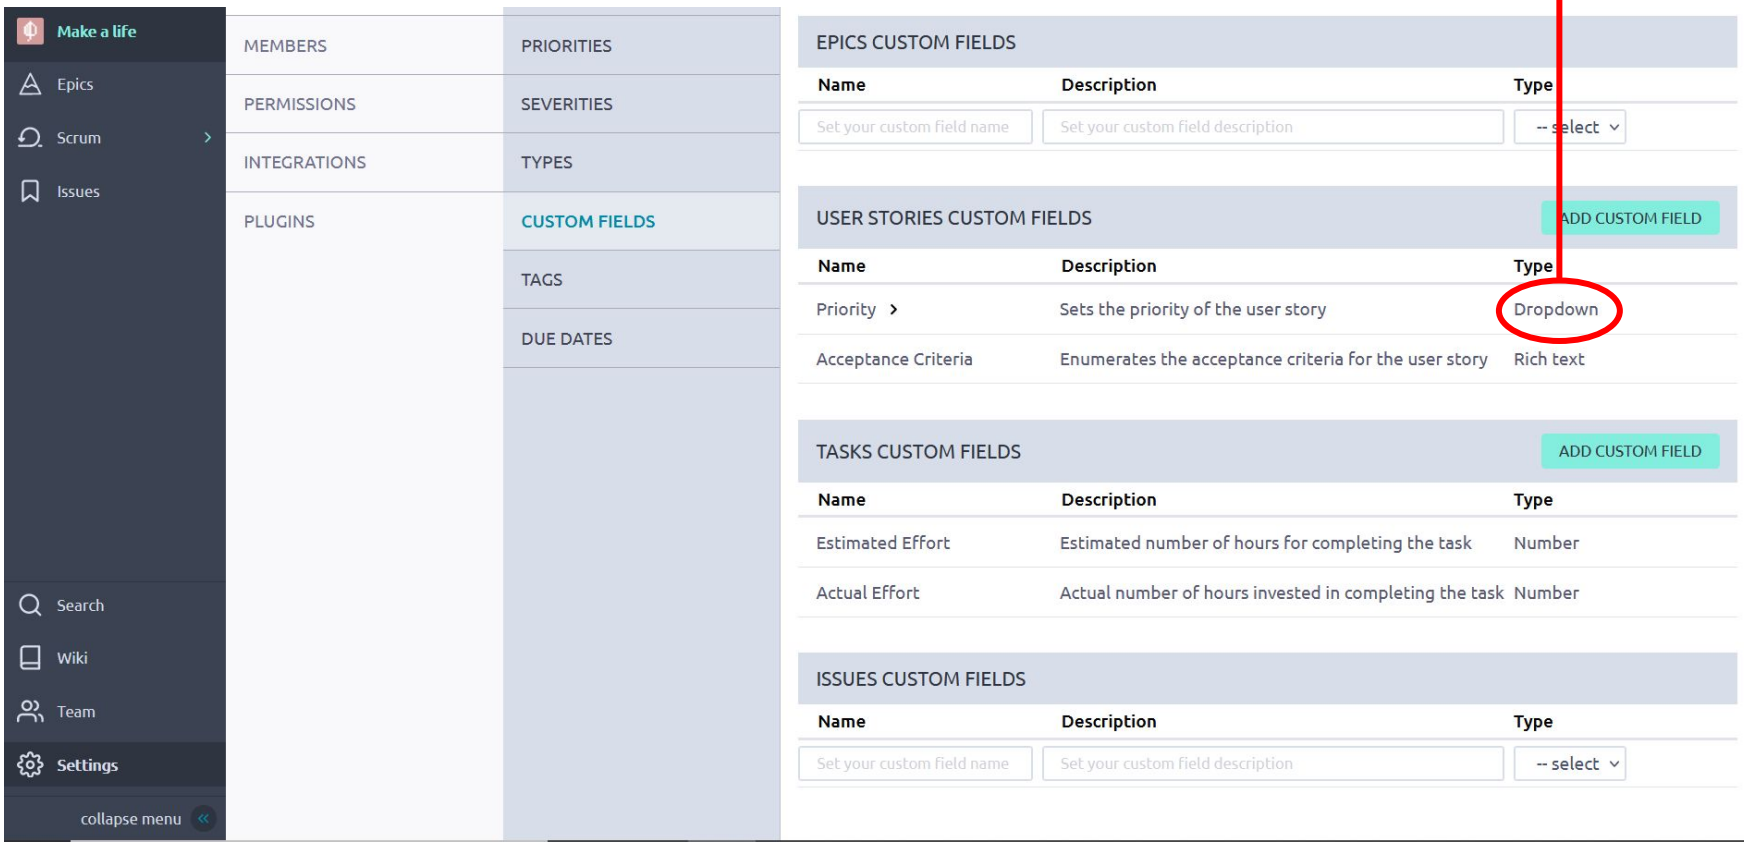

Configure Taiga (II)

All up to you, except “Custom Fields” (see next slide)

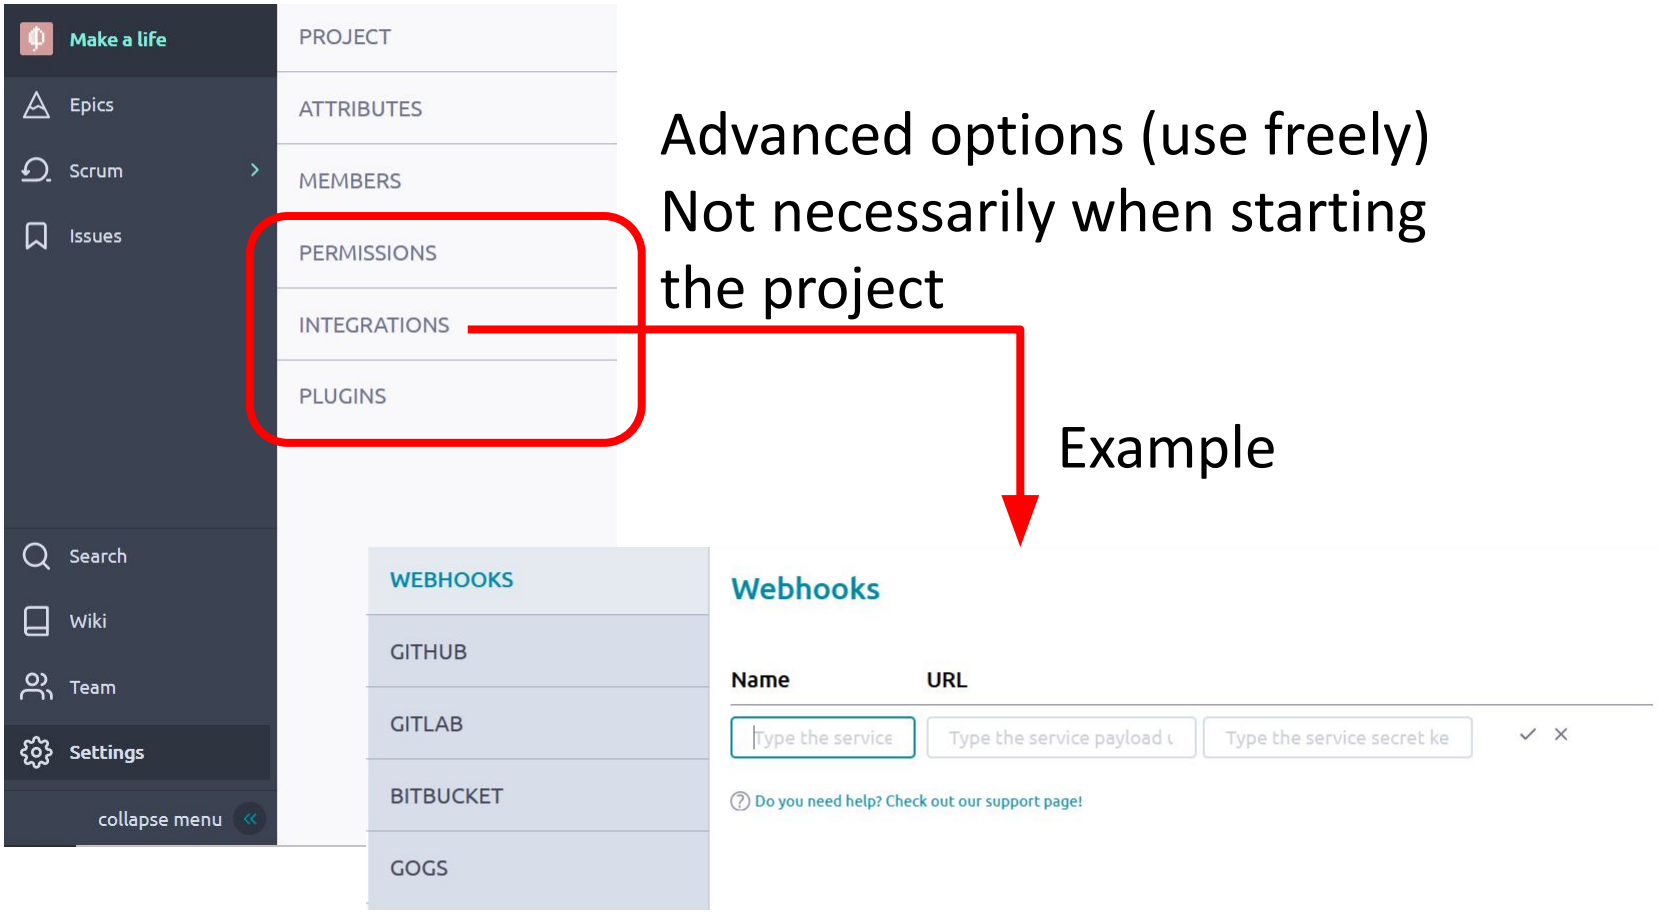

Configure Taiga (III)

Low, Medium, High

Optionally, you may include additional fields
(to be reported in the documentation)

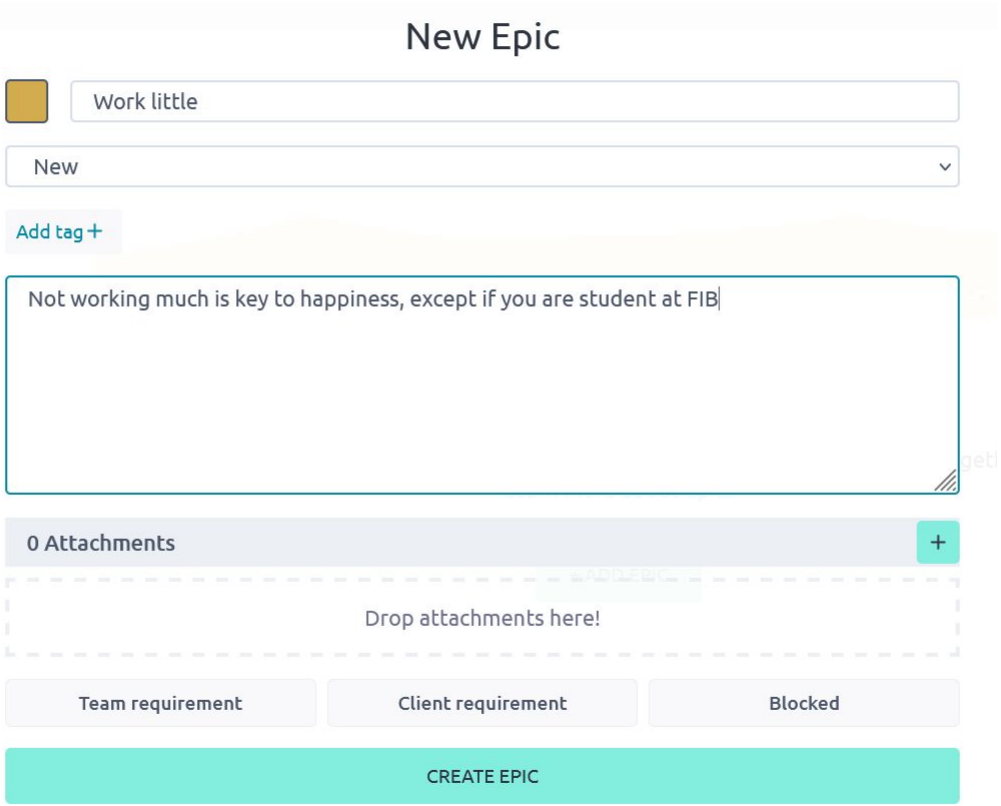

Configure Taiga (IV)

Advanced options (use freely)
Not necessarily when starting the project

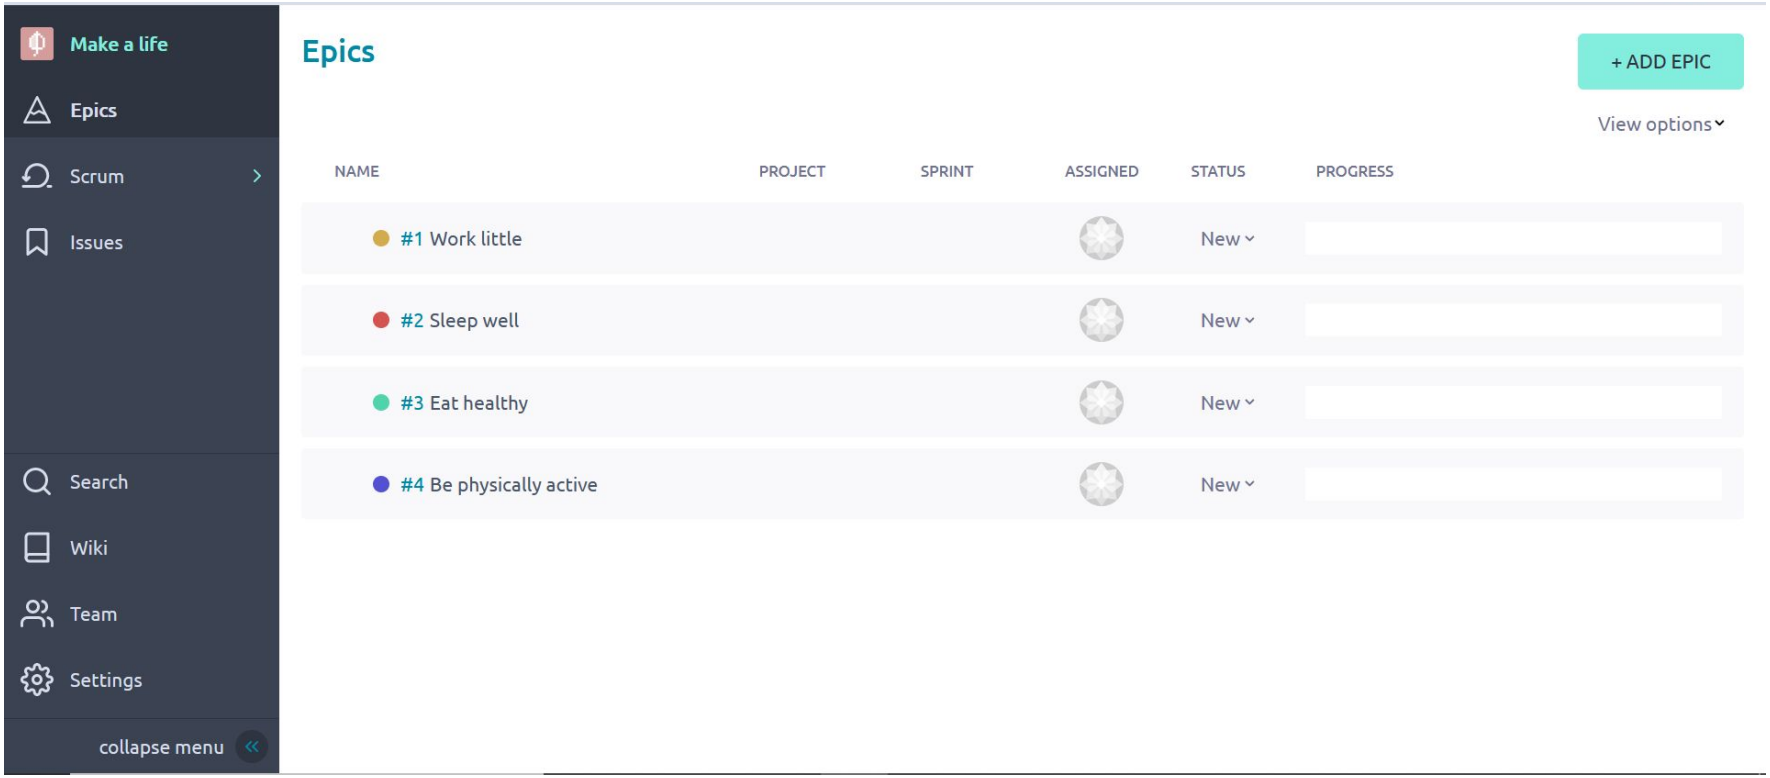

Example

Define epics (I)

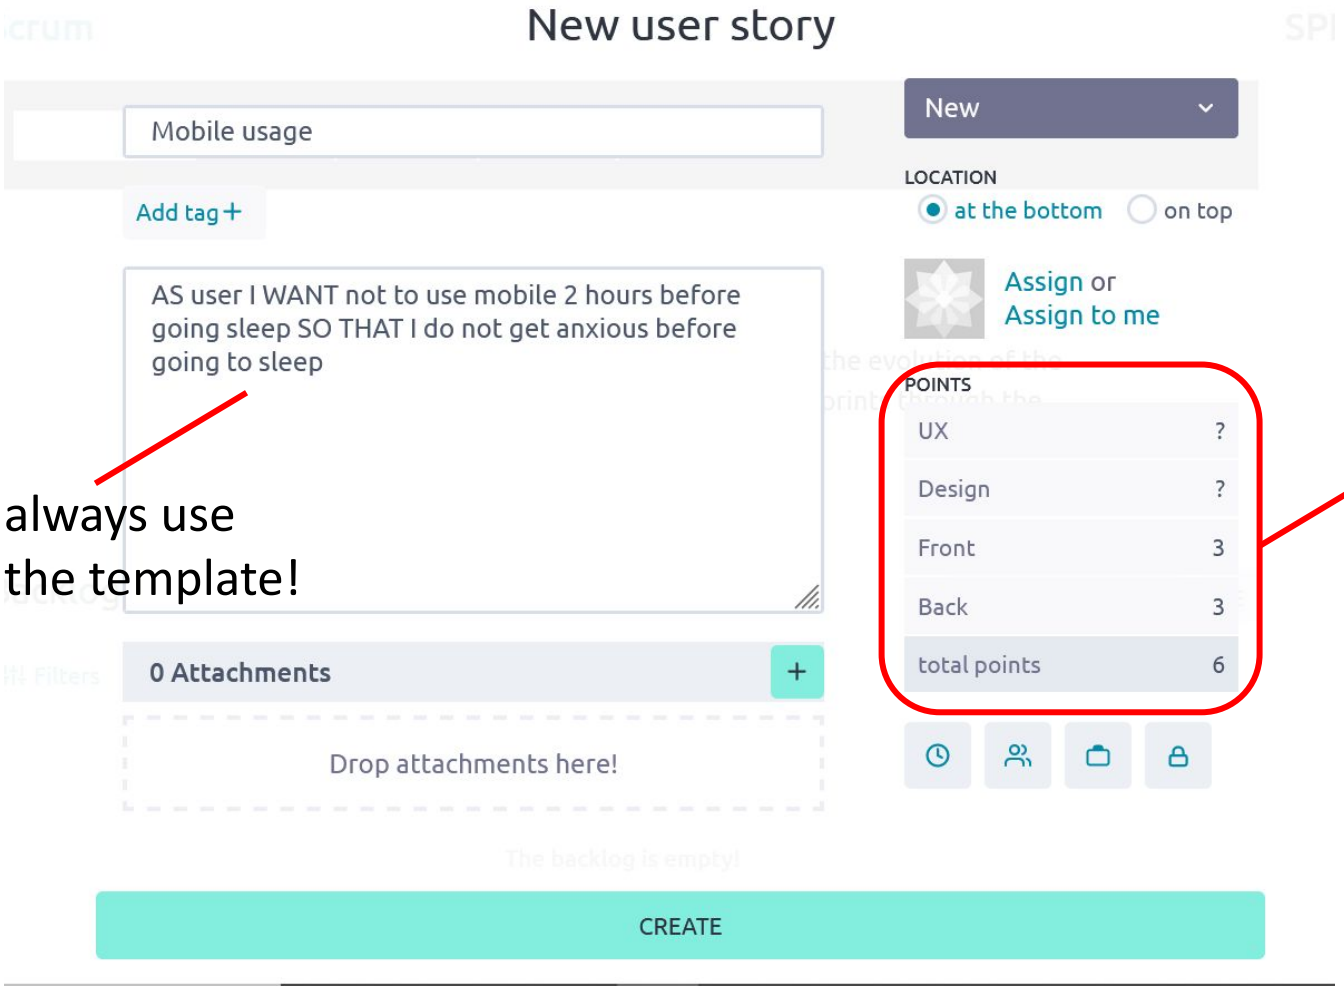

Define epics (II)

Identify a number of epics for your project

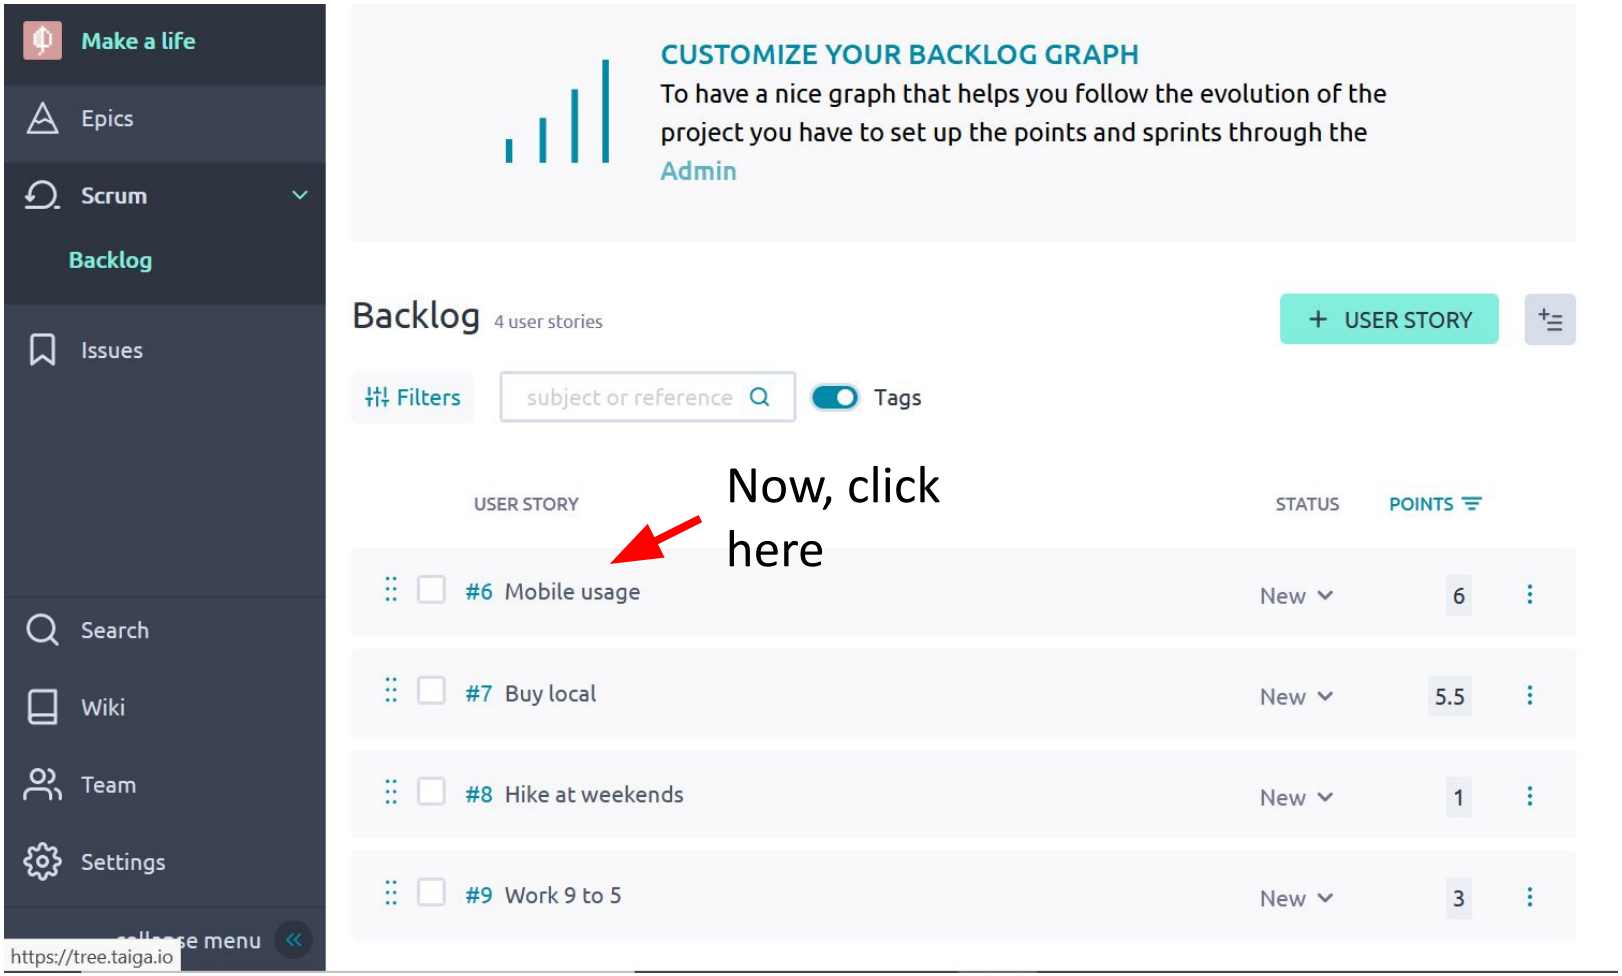

Create product backlog (I)

always use the template!

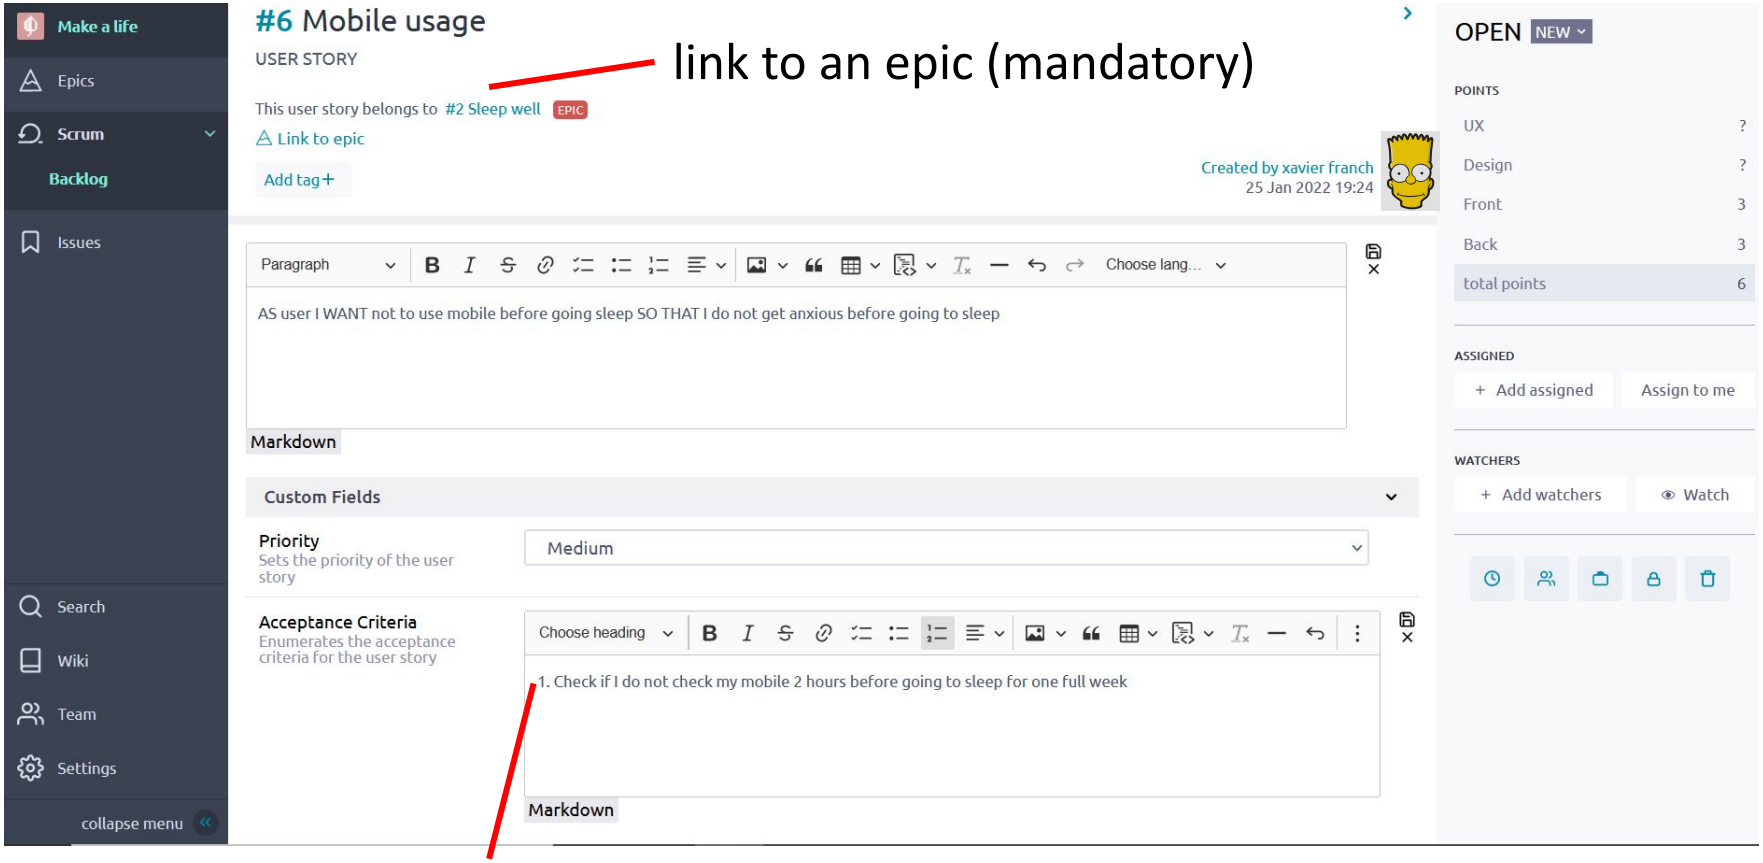

this depends on your configuration

Create product backlog (II)

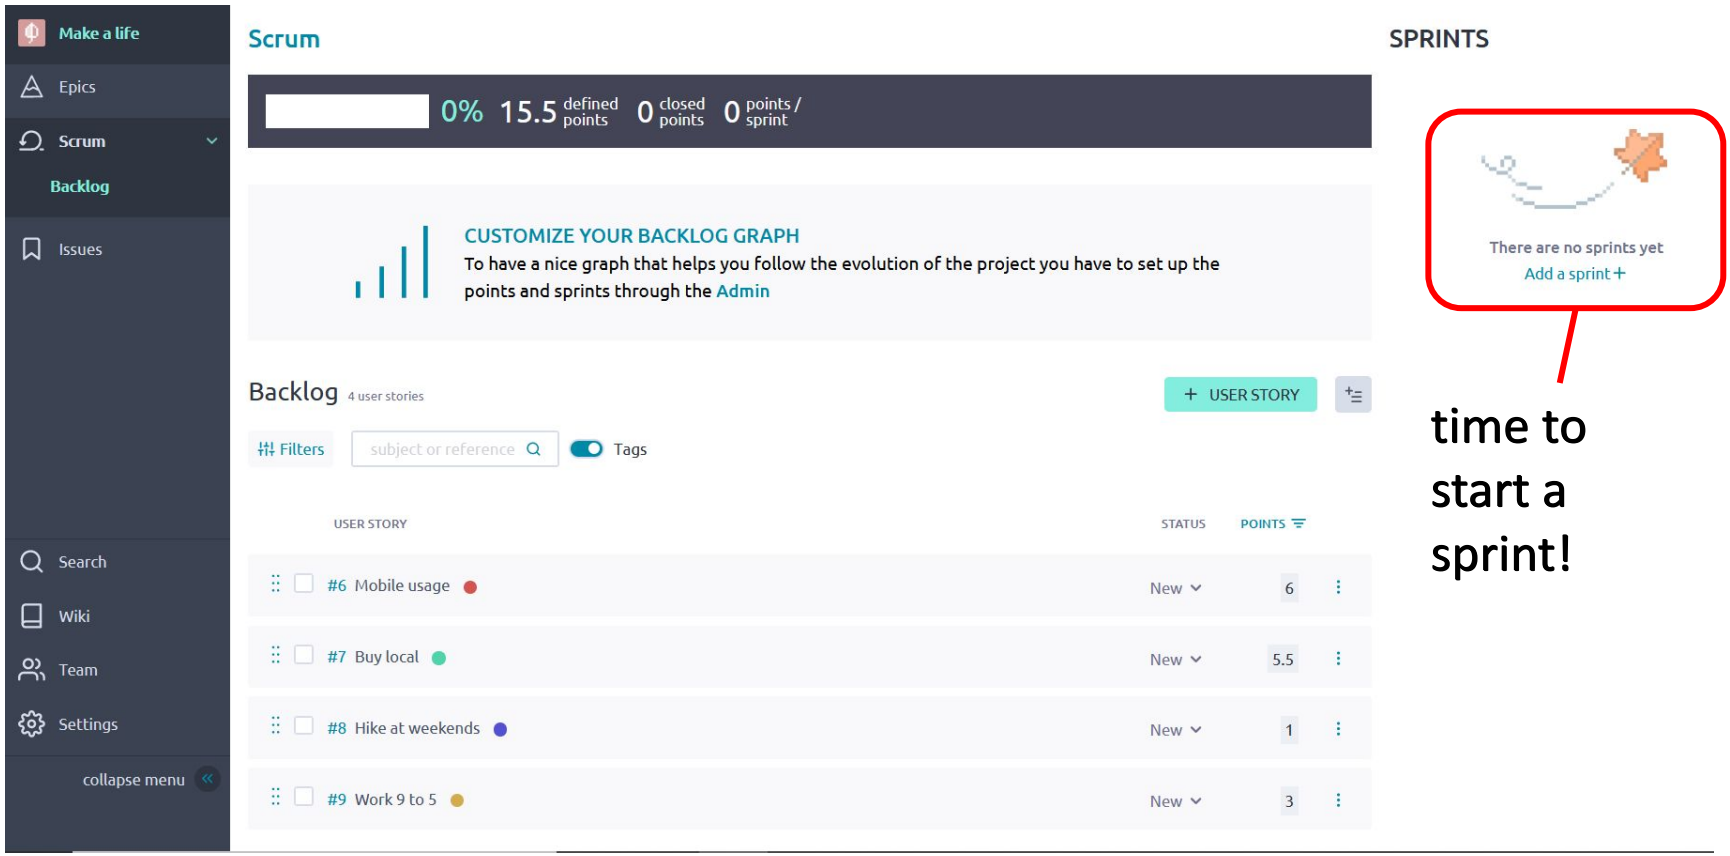

Create product backlog (III)

These actions need to be made after creating the User Story:

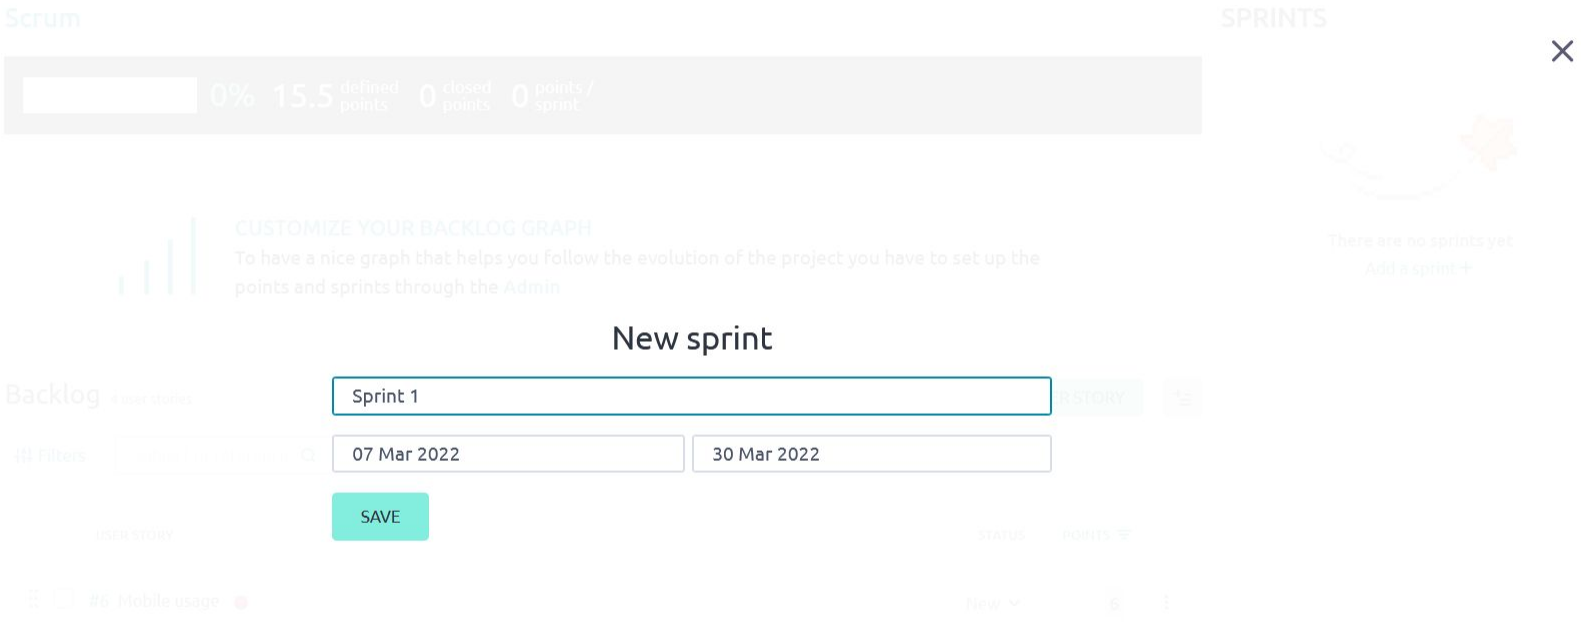

enumerate with an ordinal number (using the option at edition menu, starting at 1); in the product backlog, could be empty

Create product backlog (IV)

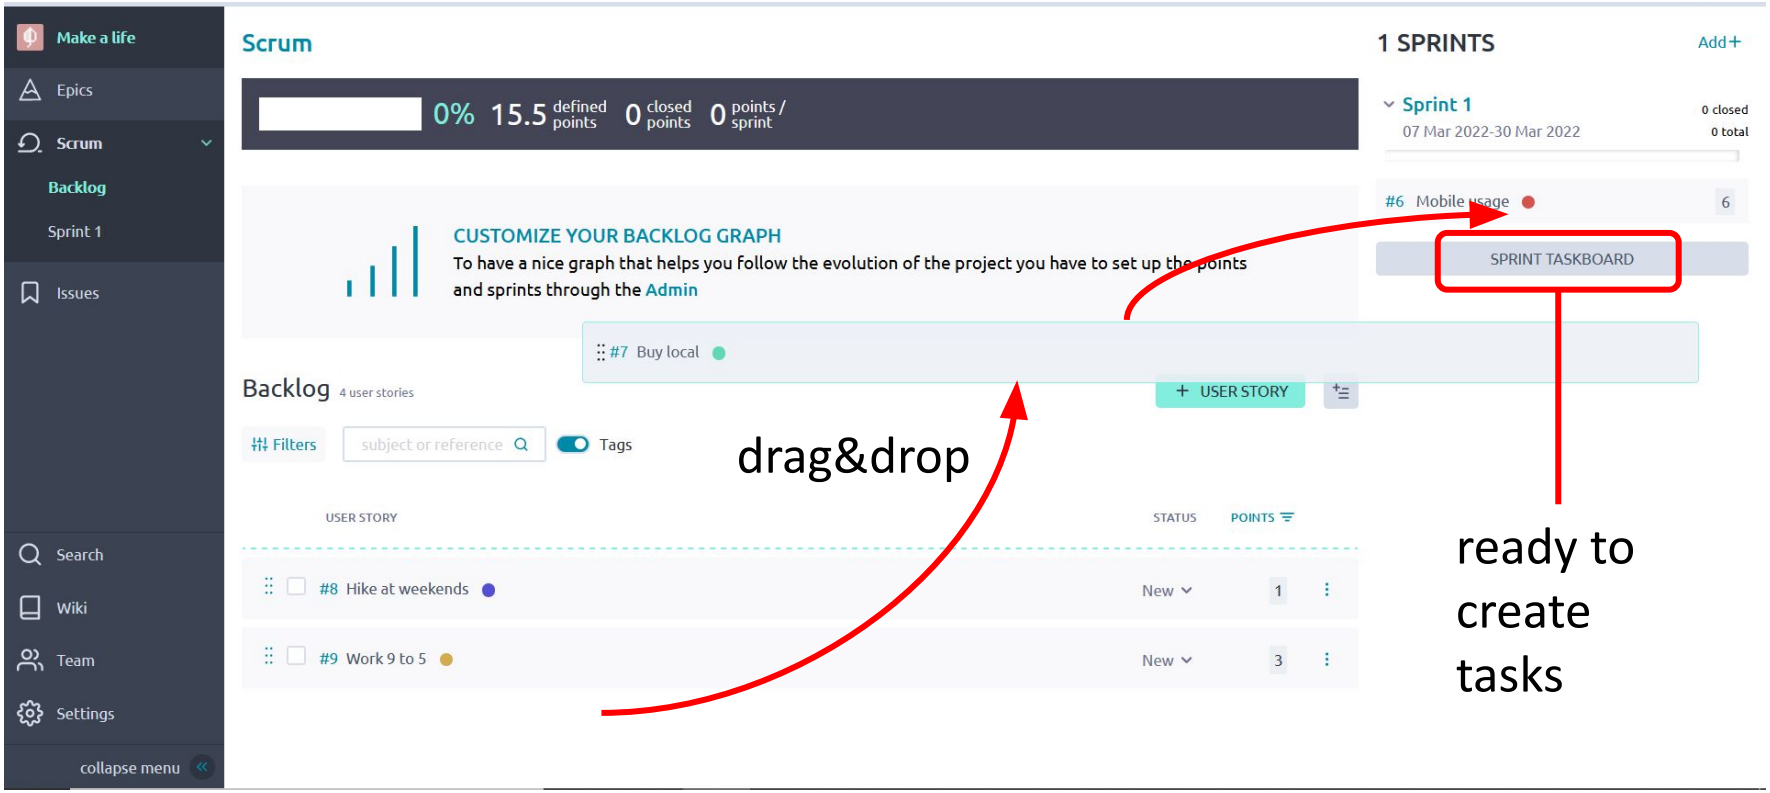

Start sprint (I)

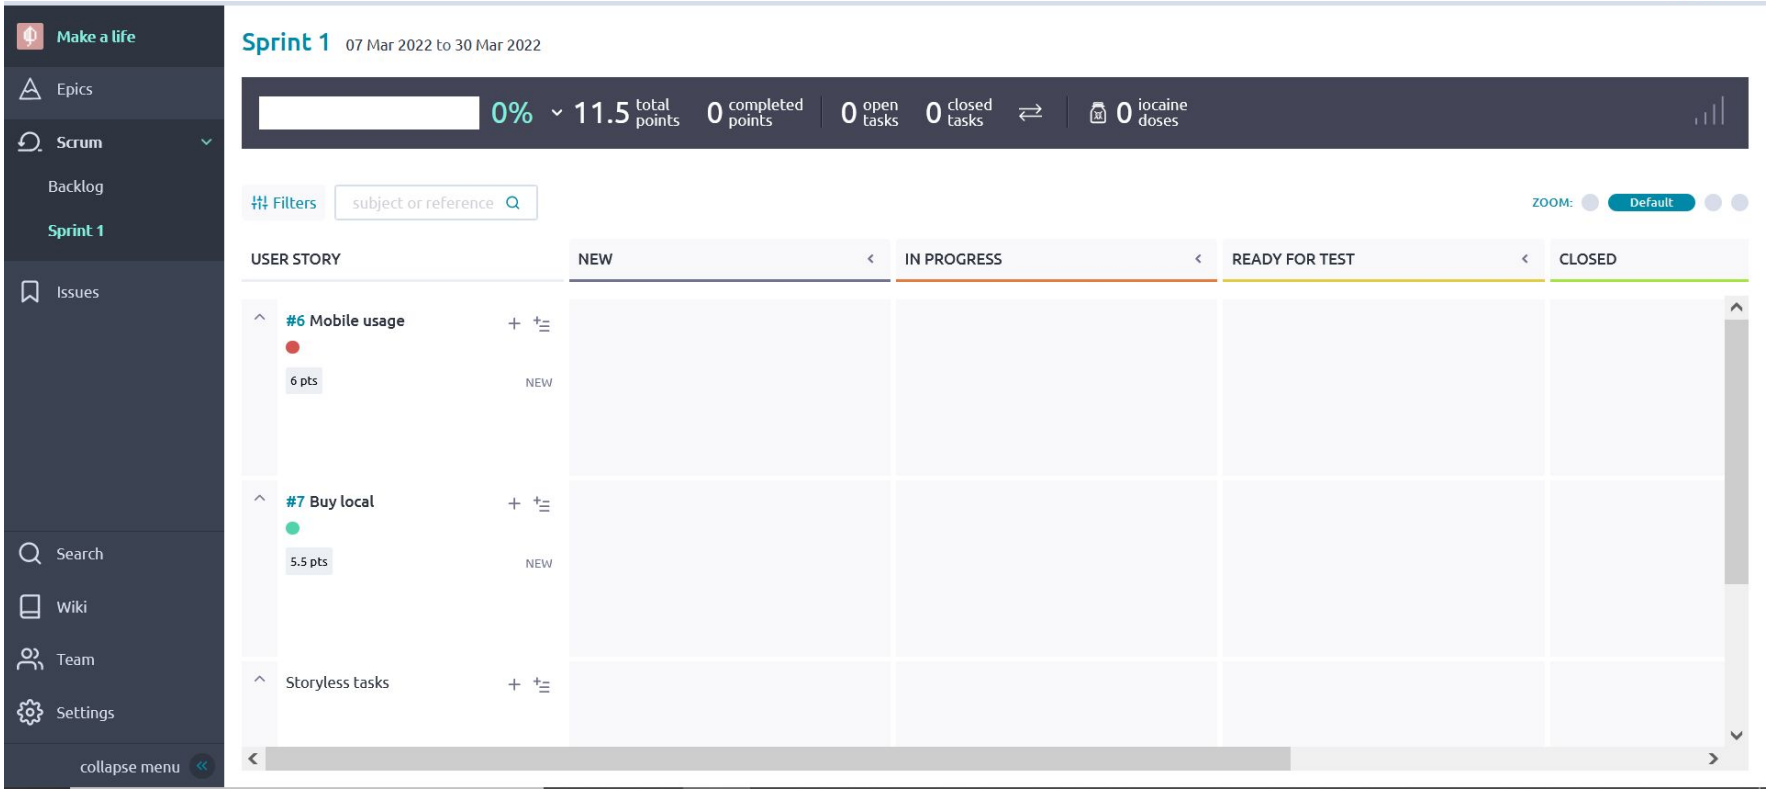

Define the Sprints for the current course (2026/27 Q1) :

- **Sprint 1**: from **19 Oct. 2026** to **13 Nov. 2026**
- **Sprint 2**: from **14 Nov. 2026** to **27 Nov. 2026**
- **Sprint 3**: from **28 Nov. 2026** to **11 Dec. 2026**

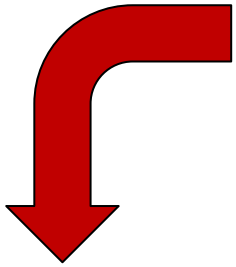

Start sprint (II)

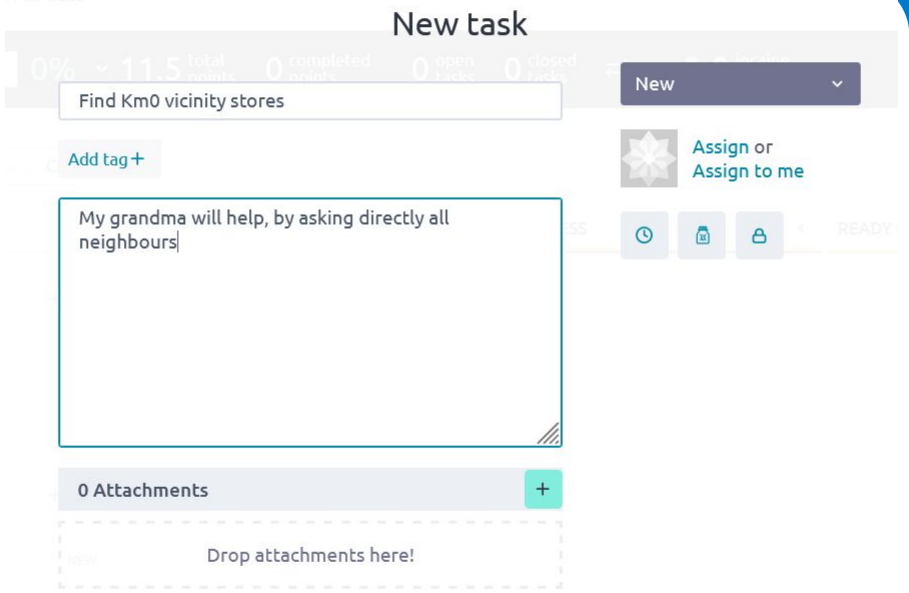

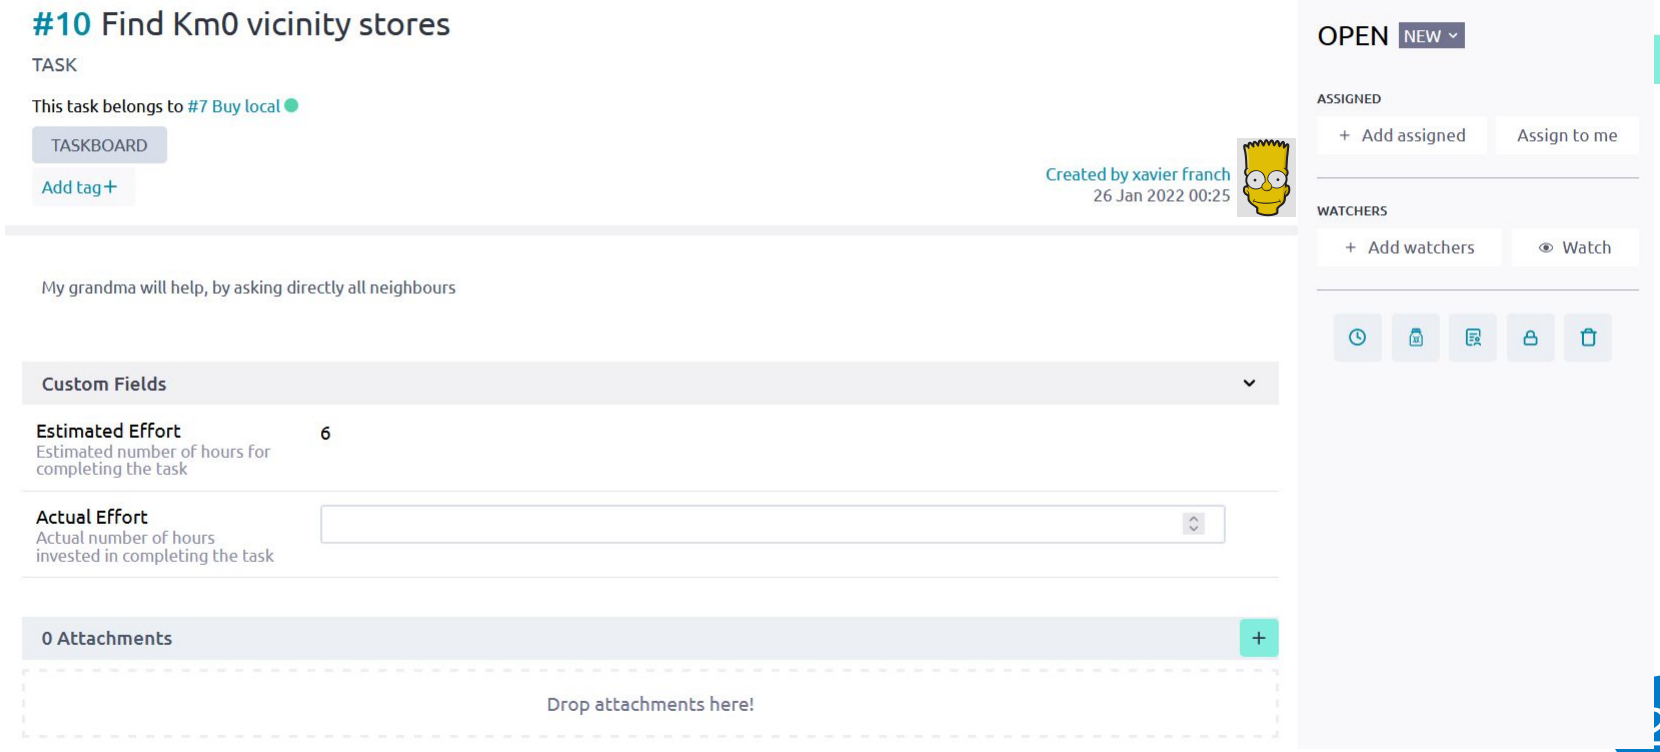

Start sprint (III)

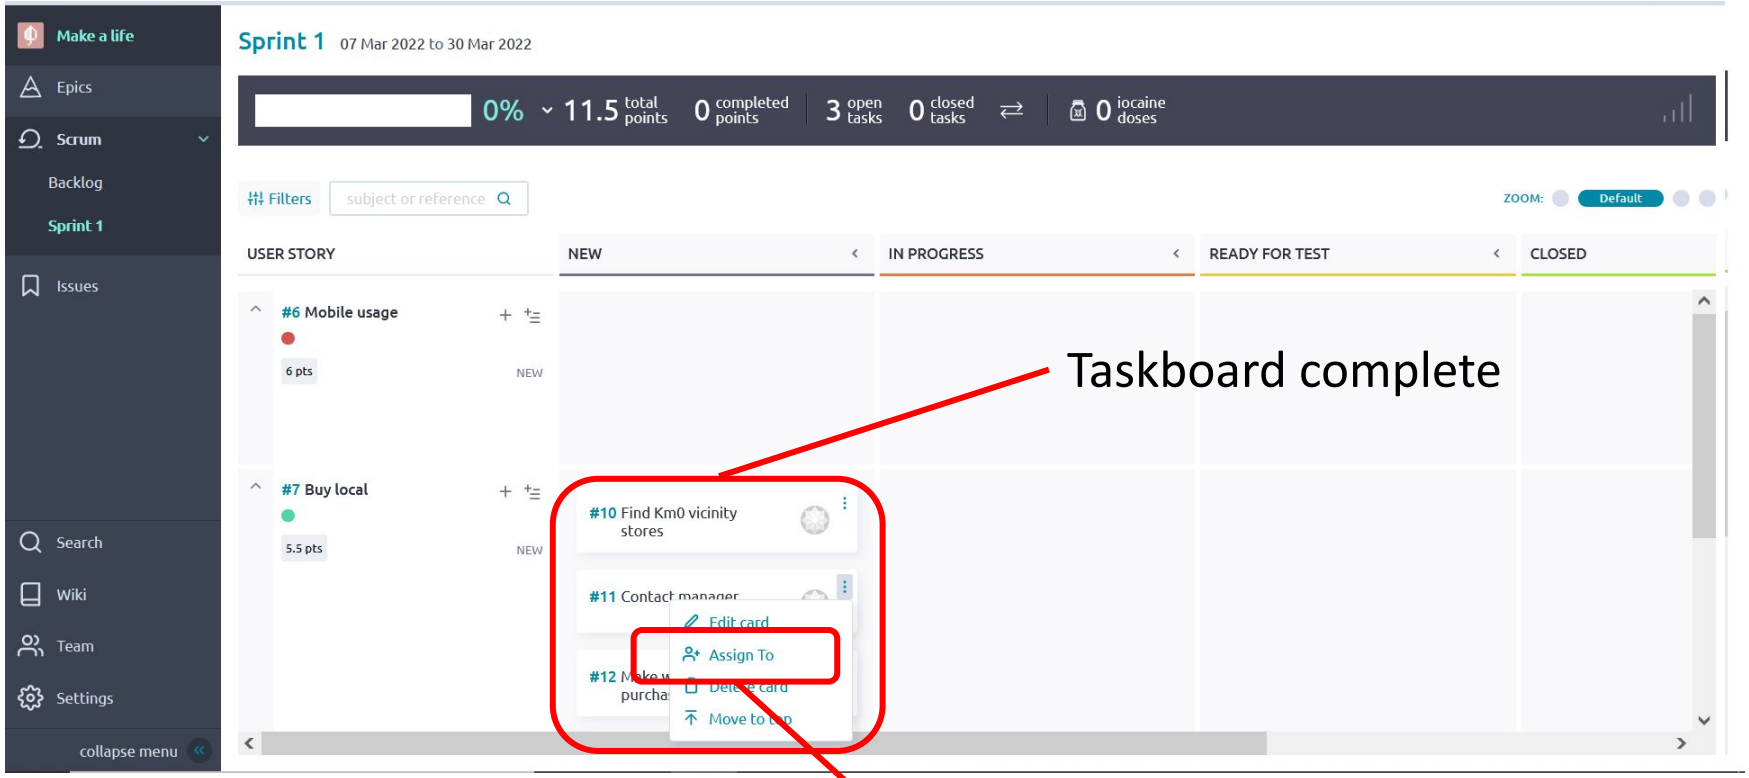

Create tasks (I)

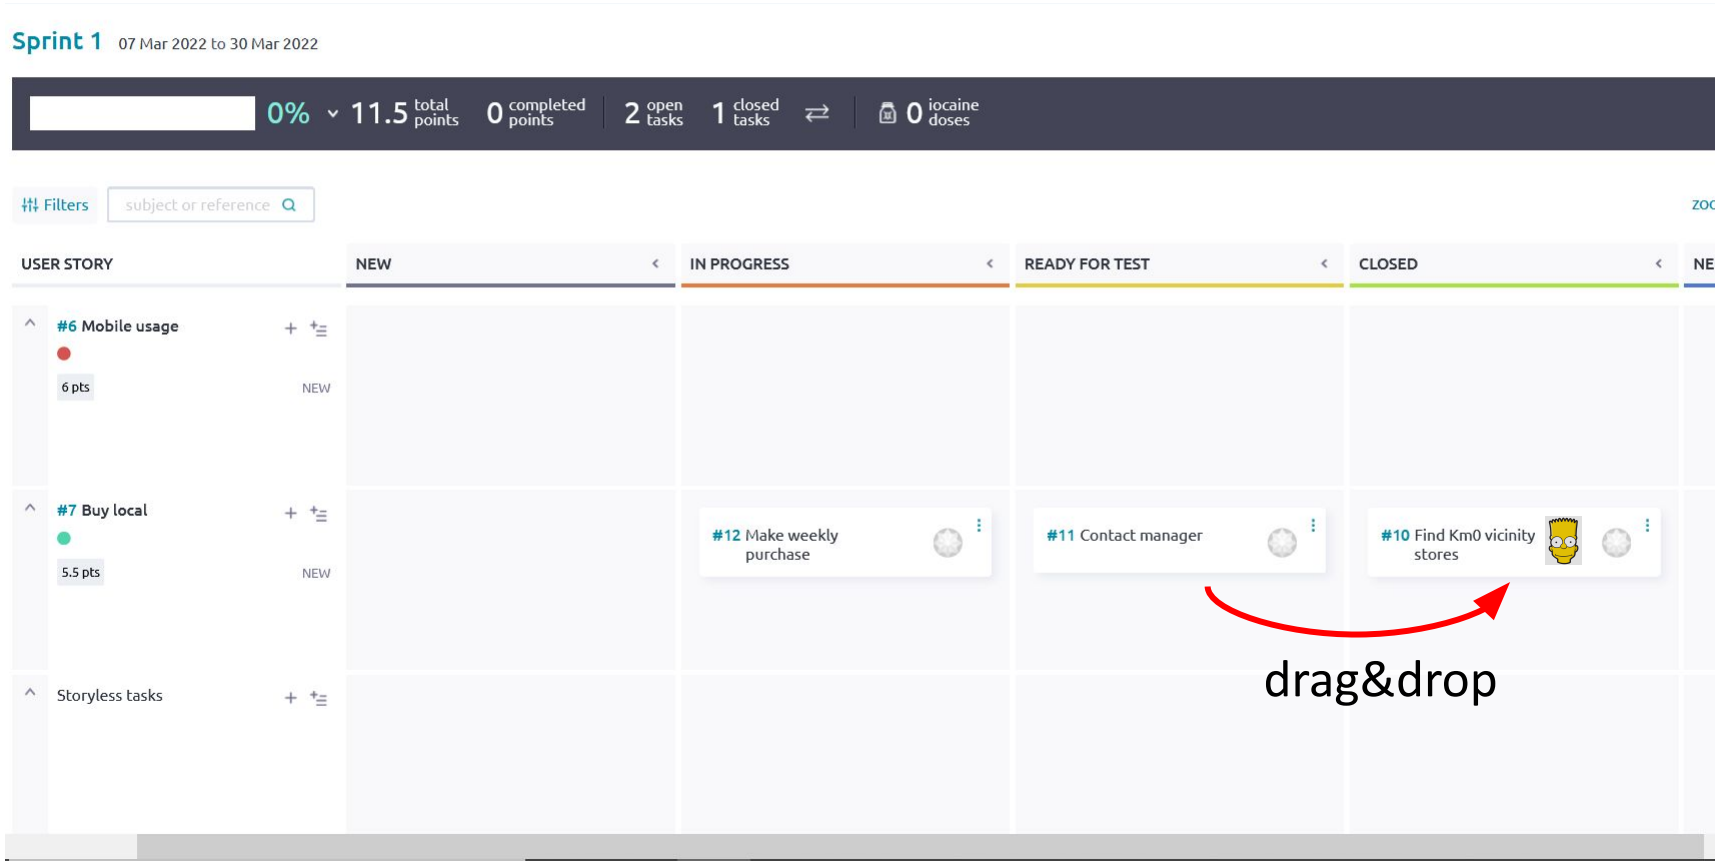

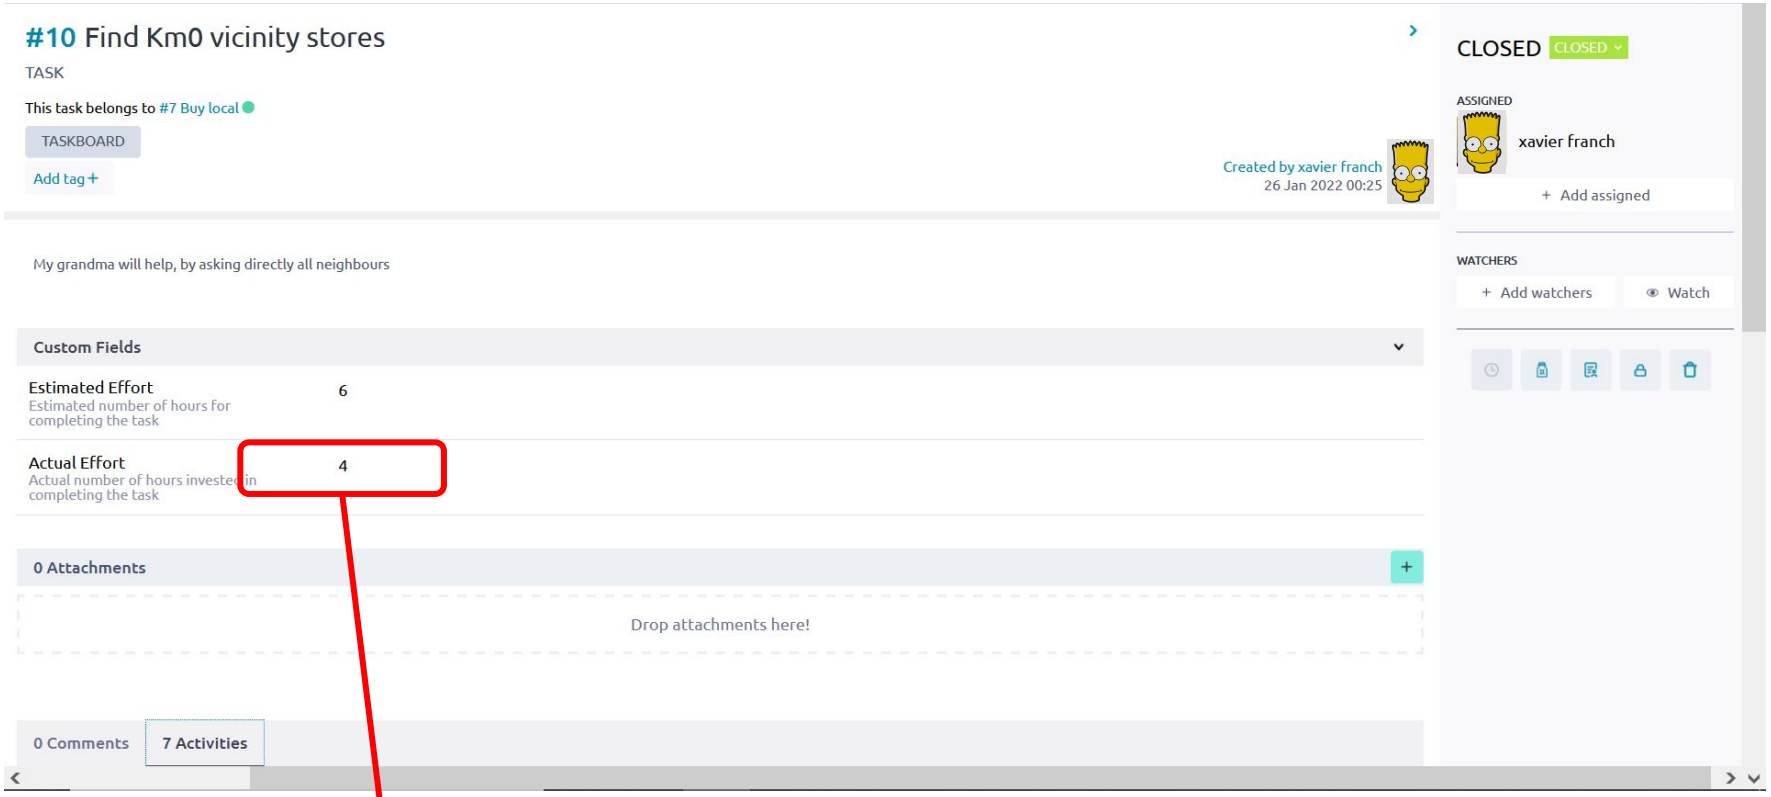

Create tasks (II)

Close tasks (I)

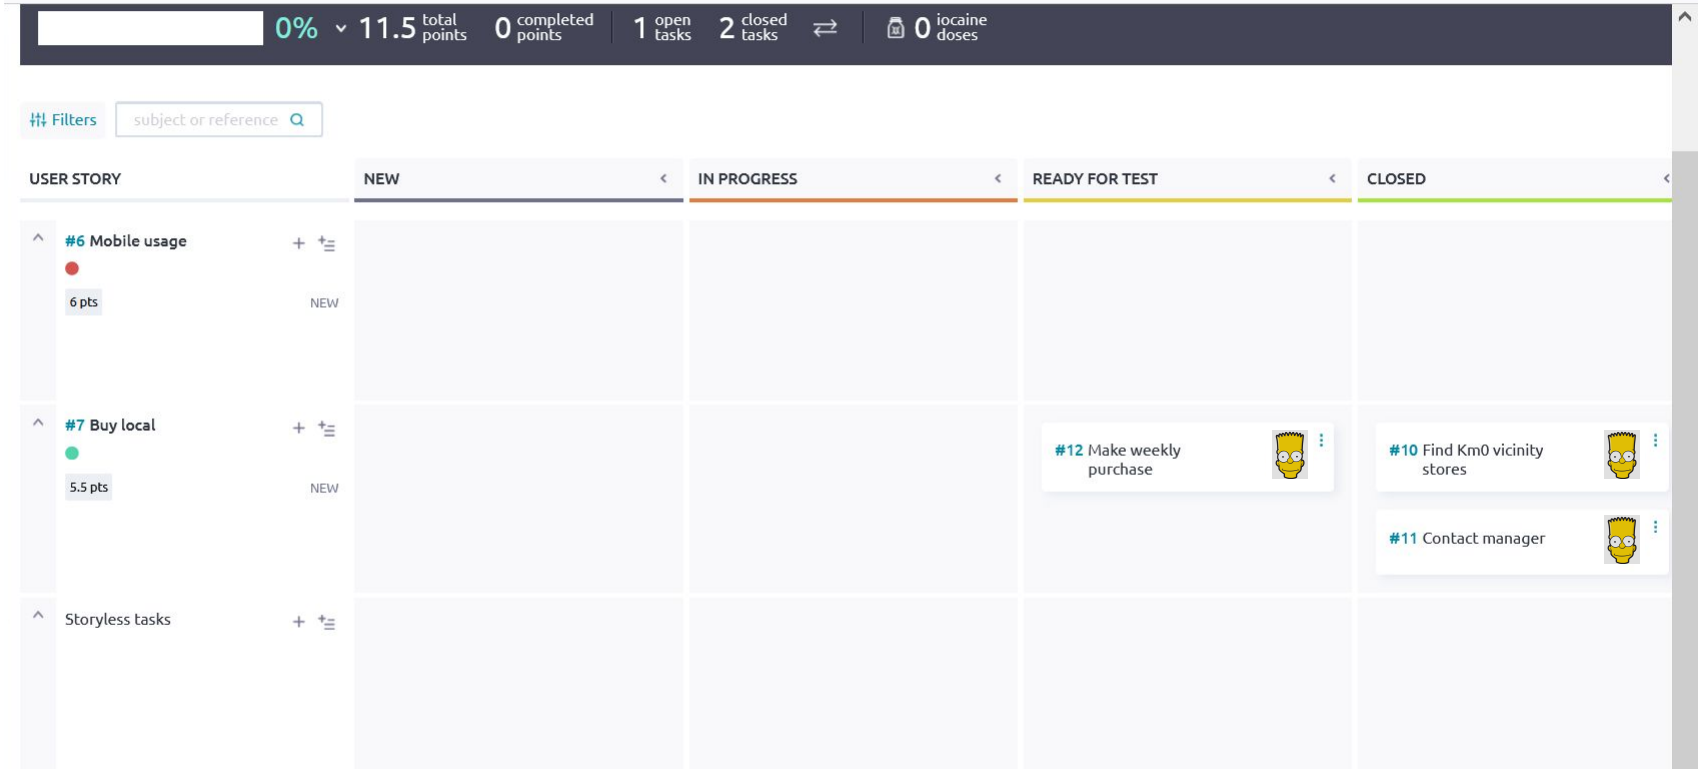

Close tasks (II)

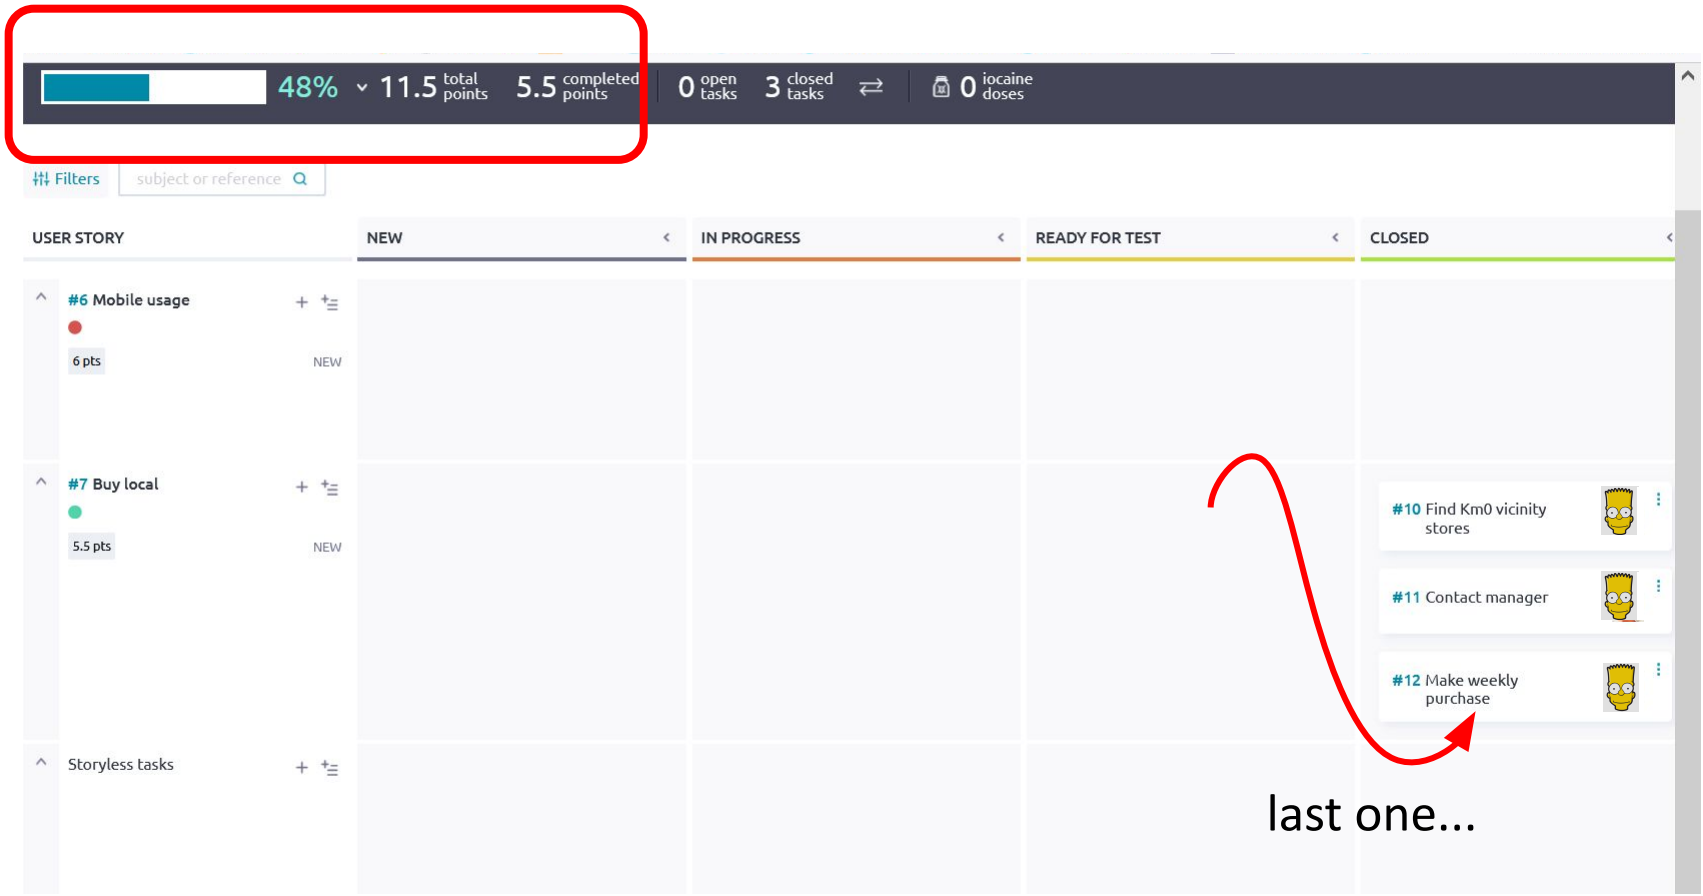

don’t forget!

Close tasks (III)

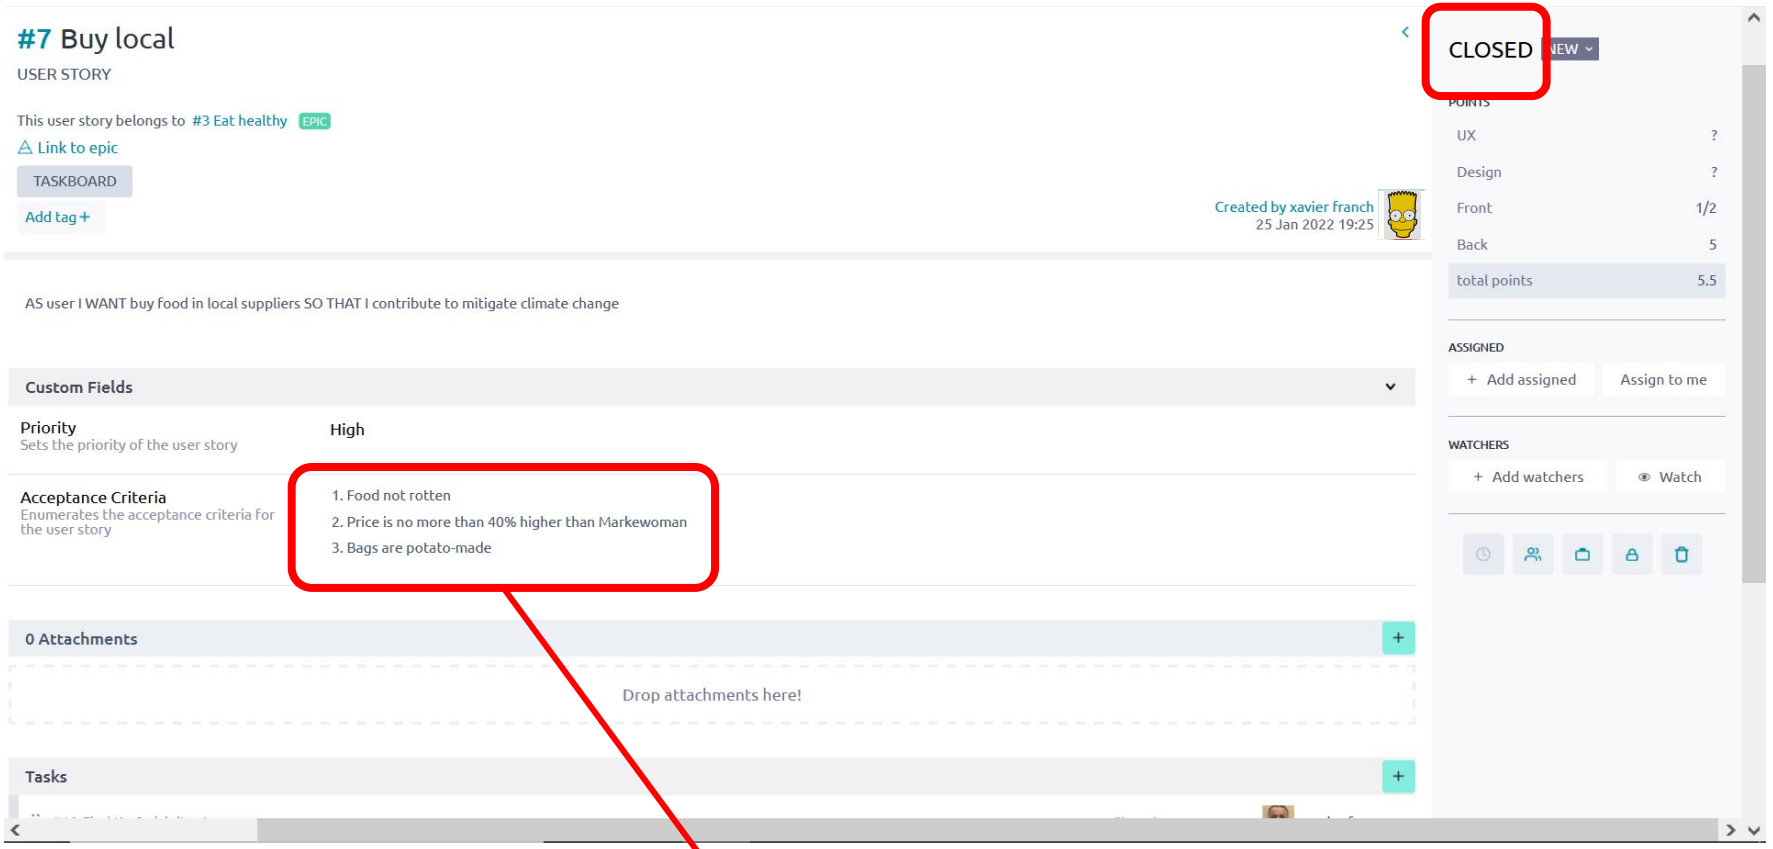

Close tasks (IV)

updated!

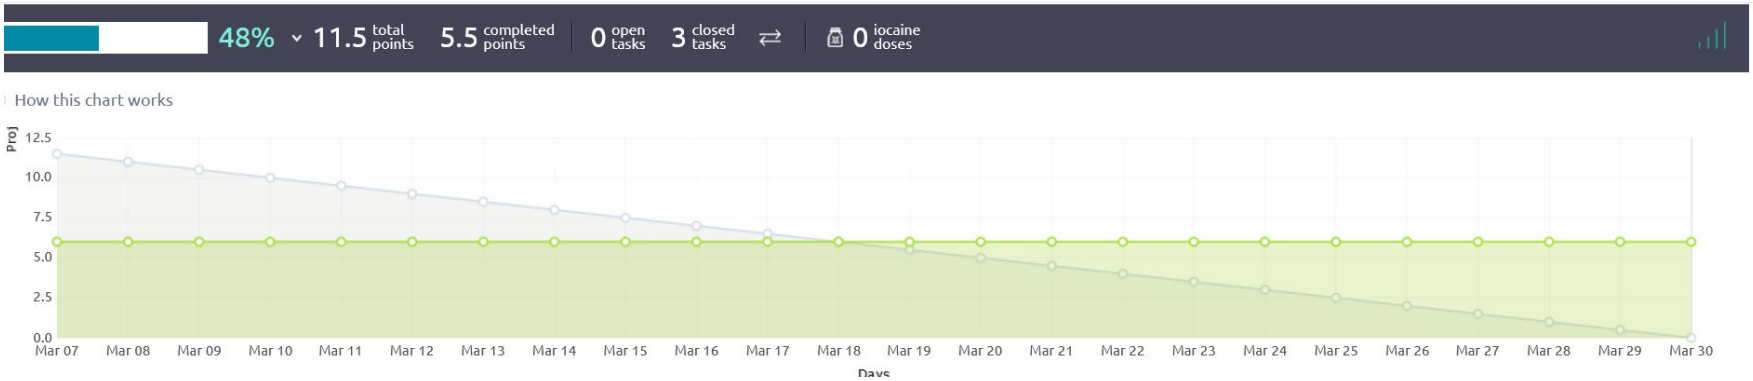

Close tasks (V)

Automatically closed

These acceptance criteria were written when moving from product backlog to sprint backlog

Close tasks (VI)

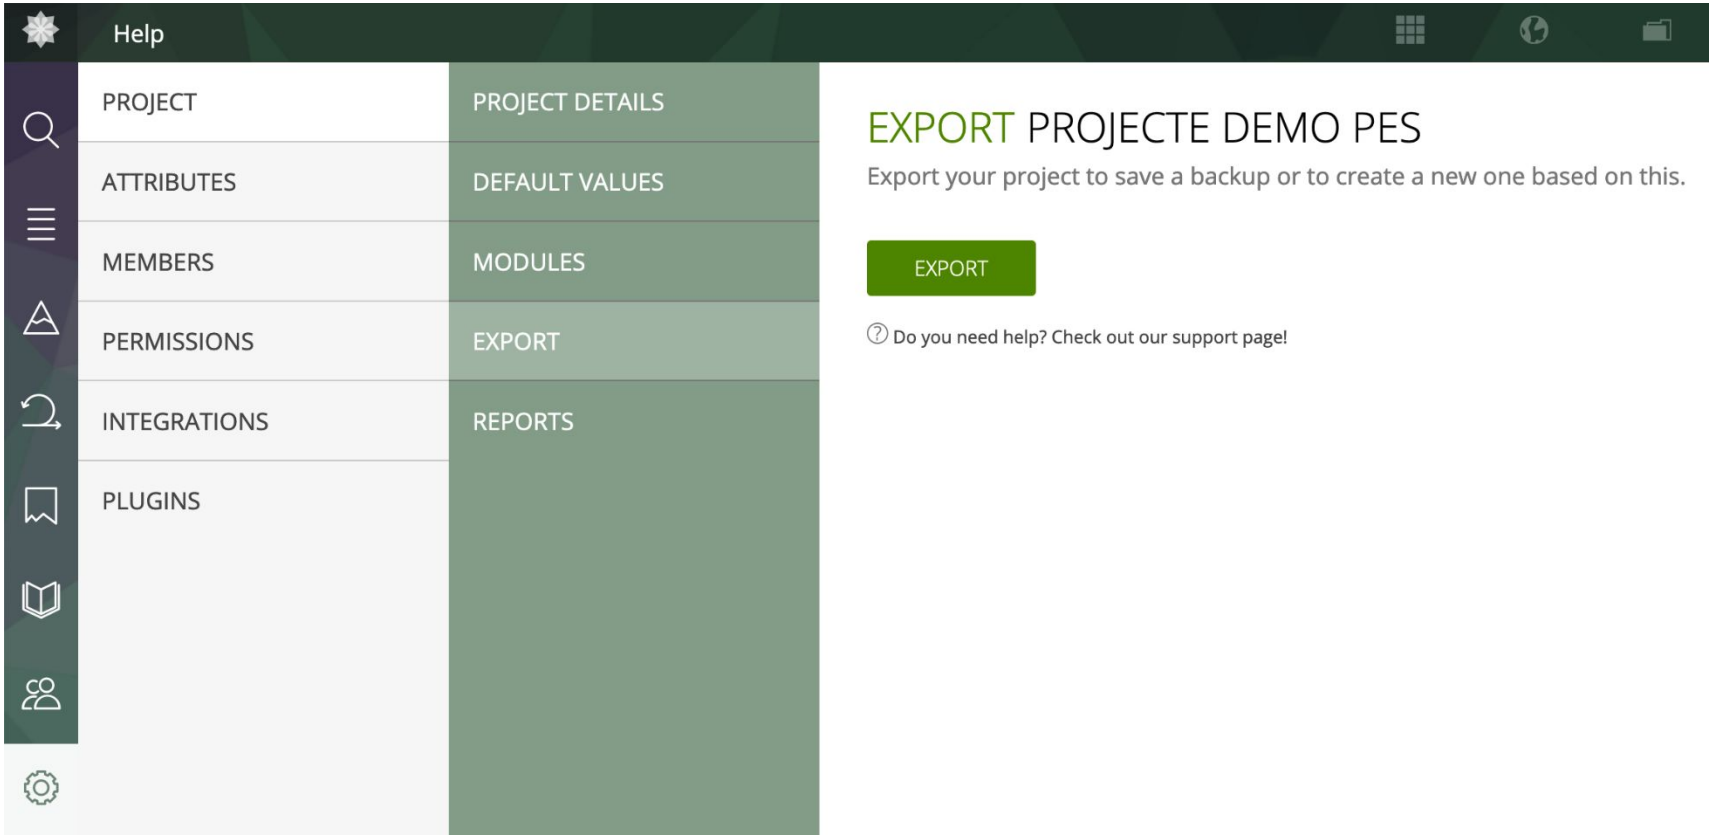

RECOMMENDATIONS

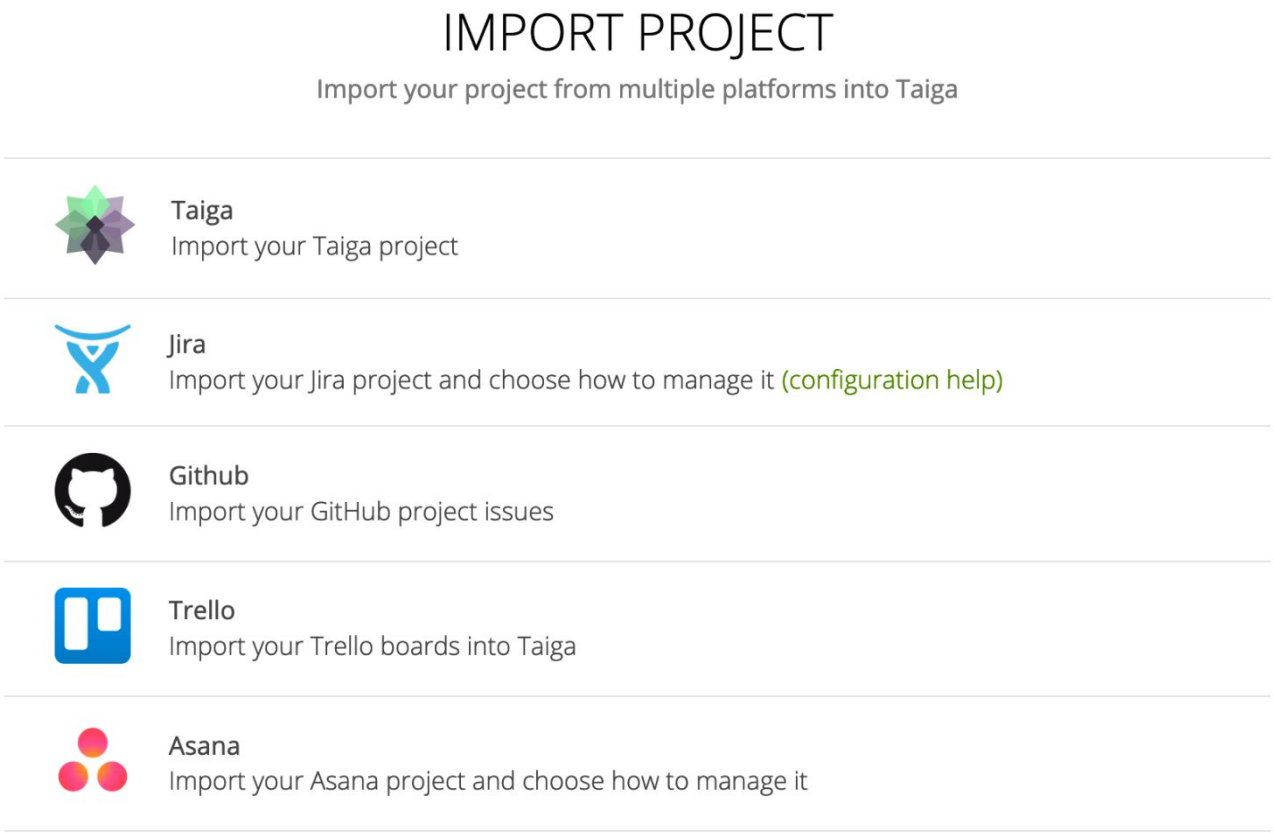

Recommendations

- Setup the number of sprints and expected story points
- Customize US and task statuses
- Sort US in the product backlog according to their priority
- Use customs fields to add useful information to US and tasks
- Take advantage of Taiga integrations and plugins

Create a backup

New project from a backup

Fag Documentation

- Share with teachers your Taiga projects
  - Project must be a restore from a backup after finishing the current sprint
  - Delivered projects must remain immutable
